تازه های نشر اخلاق
خانه اخلاق پژوهان جوان

در حوزه اخلاق به زبان انگلیسی، دریای بی‌انتهایی از کتب ارزشمند یافت می‌شود که آشنایی با این کتاب‌ها به پژوهشگران حوزه اخلاق فارسی کمک می‌کند تا با توجه به منابع غنی اسلامی، به بومی‌سازی مباحث اخلاق بپردازند. ما در مجموعه خانه اخلاق پژوهان جوان تلاش کرده‌ایم تا ذیل سایت مجموعه، مهم‌ترین کتاب‌های این حوزه را به صورت مرتب جمع‌آوری و معرفی حداقلی کنیم. **اثیکا**، عنوانی است که برای این بخش جدید سایت انتخاب کرده‌ایم که در آن، فهرستی از کتاب‌های تازه نشر به زبان انگلیسی را در اختیار علاقه‌مندان قرار خواهیم داد. ارائه فهرست کتاب‌های تازه‌نشر علاوه بر آن که نشان‌دهنده ذائقه مطالعاتی فلسفه اخلاق در خارج از زبان فارسی است، می‌تواند راهنمای خوبی برای دانشجویان و علاقه‌مندان به رشته‌های فلسفه، فلسفه اخلاق و سایر حوزه‌های مطالعاتی مربوط، برای پژوهش در موضوعات مختلف باشد. خانه اخلاق پژوهان جوان یک شکل مردمی است و از سال ۱۳۹۳ فعالیت رسمی خود را با برگزاری جلسات و کارگاه‌های فلسفه اخلاق آغاز نموده است و تا کنون نزدیک به ۲۳۰ جلسه تحت عناوین مختلف در حوزه اخلاق برگزار کرده است. ما را با عنوان خانه اخلاق پژوهان جوان گوگل کنید و به سایت ما منتقل شوید. به یاری خدا در وهله نخست، **اثیکا** به صورت فصلی منتشر خواهد شد. لیست زیر، نهمین **اثیکا**ی ماست که کتاب‌های منتشرشده بهار ۲۰۲۱ به کوشش فاطمه شریفیان در آن منعکس شده است.

AI for the Good

Artificial Intelligence and Ethics

While technology advances at a high pace in the age of machine learning, there is a lack of clear intent and framing of acceptable ethical standards. This book brings together the complex topic of "good" technology in a cross-functional way, alternating between theory and practice.

The authors address the ever-expanding discussion on Artificial Intelligence (AI) and ethics by providing an orientation. Pragmatic and recent issues are especially taken into account such as the collateral effects of the COVID19 pandemic. An up-to-date overview of digitization - already a very broad field in itself - is presented along with an analysis of the approaches of AI from an ethical perspective.

A Theory of Prudence

Much of knowing what to do is knowing what to do for ourselves, but knowing how to act in our best interest is complex---we must know what benefits us, what burdens us, and how these facts present and constitute considerations in favor of action. Additionally, we must know how we should weigh our interests at different times---past, present, and future. Dale Dorsey argues that a theory of prudence is needed: a theory of how we ought to act when we are acting for ourselves. *A Theory of Prudence* provides a comprehensive account of prudence, including the metaethics of prudential value, the nature of the personal good, the reasons of prudence, and the structure of prudential normativity over time.

An Introduction to Human-Animal Relationships

A Psychological Perspective

Hollin examines the topic of the relationships between humans and animals as seen in owning a companion animal alongside more indirect relationships such as our approaches to eating meat. The core issues under discussion include the moral and ethical issues raised in using animals for entertainment, in therapy, to keep us safe, and in sports such as horse racing. The justifications for hunting and killing animals as sport and using animals in scientific experimentation are considered. The closing chapter looks to the future and considers how conservation and climate change may influence human-animal relationships.

Climate Change and Sovereignty

An Essay on the Moral Nature and Limits of State Sovereignty

In this book, Andy Mueller examines the ways in which epistemic and practical rationality are intertwined. In the first part, he presents an overview of the contemporary debates about epistemic norms for practical reasoning, and defends the thesis that epistemic rationality can make one practically irrational. Mueller proposes a contextualist account of epistemic norms for practical reasoning and introduces novel epistemic norms pertaining to ends and hope. In the second part Mueller considers current approaches to pragmatic encroachment in epistemology, ultimately arguing in favor of a new principle-based argument for pragmatic encroachment. While the book defends tenets of the knowledge-first programme, one of its main conclusions is thoroughly pragmatist: in an important sense, the practical has primacy over the epistemic

A Wild West of the Mind

Can unexpressed thoughts be morally wrong? Are people subject to moral condemnation not only for their malicious, biased, and cruel actions, but also for their private malice, biased beliefs, and ugly fantasies? Although many would answer "yes," George Sher argues in *A Wild West of the Mind* that none of the main approaches to morality support this view and that to accept it would be to relinquish an essential aspect of our mental freedom. To preserve that freedom, we must allow our beliefs to follow the evidence wherever it leads and must give our private feelings, attitudes, and fantasies free rein. As so understood, the realm of the purely mental is a morality-free zone, one within which no thoughts or attitudes are either forbidden or required.

Being and Freedom

On Late Modern Ethics in Europe

Being and Freedom is a panoramic account of ethics in Europe from the French Revolution to the end of the nineteenth century. In this period the influence of ethics ran far beyond philosophy, eventually dominating politics and religion in the West. Developments came from France, Germany, and Britain: this is the first book to treat them together as a Europe-wide phenomenon, paying attention to the context of events and ideas from which they emerged. Skorupski begins by examining the philosophical conflict at the heart of the French revolution, between the individualism of the Enlightenment and two very different forms of holistic ethics: the old regime's ethic of service and the radical-democracy of the Rousseauian left.

Climate Change and Sovereignty

An Essay on the Moral Nature and Limits of State Sovereignty

Author:
Joshua J. Kassner

Hardcover:
207 Pages

Publisher:
Springer
May 2021

This book offers a meditation on global justice and international political and legal theory. The author assesses positions in the current debate over the moral nature and limits of sovereignty. He also evaluates the normative role sovereignty ought to play in the practical deliberations of states.

The discussion moves from theory to practice. Coverage starts with a conceptual analysis and moral critique. It then goes on to consider specific issues. These include global climate change, secession and self-determination, human rights, global distributive justice, and immigration. Readers will learn how states ought to deliberate about and respond to these important topics.

Biolaw

Origins, Doctrine and Juridical Applications on the Biosciences

This book configures a consistent epistemology of biolaw that distinguishes itself from bioethics and from a mere set of international instruments on the regulation of biomedical practices. Such orthodox intellection has prevented biolaw from being understood as a new branch of law with legally binding force, which has certainly dwindled its epistemological density. Hence, this is a revolutionary book as it seeks to deconstruct the history of biolaw and its oblique epistemologies, which means not accepting perennial axioms, and not seeing paradigms where only anachronism and anomaly still exist.

Cognitive Film and Media Ethics

Cognitive Film and Media Ethics provides a grounding in the use of cognitive science to address key questions in film, television and screen media ethics. This book extends past works in cognitive media studies to answer normative and ethically prescriptive questions: what could make media morally good or bad, and what, then, are the respective responsibilities of media producers and consumers? Moss-Wellington makes a primary claim that normative propositions are a kind of rigour, in that they force media theorists to draw more active *ought* conclusions from descriptive *is* arguments.

Communicating Aggression in a Megamedia World

This book describes how, in the era of megamedia culture, aggression in communication constitutes a threat to the communication community. Based on the theoretical incorporation of transcendental pragmatics, the book explores how conceptualizing the phenomena of megamedia aggression from this perspective and diagnosing their destructive force are essential for: postulating the need for constructing a theory of media communication closely related to the model of discursive rationality, giving this theory a critical and normative character, and embedding it in the perspective of the project of social co-responsibility and in the plan for an ethics of co-responsibility.

CSR and Codes of Business Ethics in the USA, Austria (EU) and China and their Enforcement in International Supply Chain Arbitrations

This book analyzes the implementation of CSR reporting and codes of business conduct and ethics in the legal systems of the USA, Austria and China and their enforcement in international supply chain arbitrations. The book demonstrates that long-term profit maximization is increasingly intertwined with corporate ethics and CSR policies. In order to prevent window-dressing and greenwashing, certain control mechanisms and legal standards are required along the entire supply chain.

Engineering and Philosophy

Reimagining Technology and Social Progress

Editors:
Zachary Pirtle & ...

Hardcover:
385 Pages

Publisher:
Palgrave Macmillan
May 2021

Engineers love to build “things” and have an innate sense of wanting to help society. However, these desires are often not connected or developed through reflections on the complexities of philosophy, biology, economics, politics, environment, and culture. To guide future efforts and to best bring about human flourishing and a just world, *Engineering and Philosophy: Reimagining Technology and Progress* brings together practitioners and scholars to inspire deeper conversations on the nature and varieties of engineering. The perspectives in this book are an act of re-imagination: how does engineering serve society, and in a vital sense, how should it.

Duty to Self

Moral, Political, and Legal Self-Relation

That we owe duties to others is a commonplace, the subject of countless philosophical treatises and monographs. Morality is interpersonal and other-directed, many claim. But what of what we owe ourselves? In *Duty to Self*, Paul Schofield flips the paradigm of interpersonal morality by arguing that there are moral duties we owe ourselves, and that in light of this, philosophers need to significantly rethink many of their views about practical reason, moral psychology, politics, and moral emotions.

Examples and Their Role in Our Thinking

This book investigates the role and significance that examples play in shaping arguments and thought, both in philosophy and in everyday life. It addresses questions about how our moral thinking is informed by our conceptual practices, especially in ways related to the relationship between ethics and literature, post-Wittgensteinian ethics, or meta-philosophical concerns about the style of philosophical writing. Written in an accessible and non-technical style, the book uses examples from real-life events or pieces of well-known fictional stories to introduce its discussions. In doing so, it demonstrates the complex way examples, rather than exemplifying philosophical points, inform and condition how we approach the points for which we want to argue.

Distributing the Harm of Just Wars

In Defence of an Egalitarian Baseline

International law requires that combatants in war take 'all feasible precautions' to minimise damage to civilian objects, injury to civilians, and incidental loss of civilian life. However, there is no clear explanation of what 'feasible precautions' means in this context, or what would count as sufficiently minimised incidental harm. As a result, it is difficult to judge whether a particular war or offensive actually satisfies this requirement. Just war theorists often consider it common sense that merely not intending to harm innocent civilians is not sufficient, but there is little clarity in the literature regarding what this means. One crucial question that is almost always overlooked is that of what the appropriate baseline distribution of risk should be.

Dear Prudence

The Nature and Normativity of Prudential Discourse

Philosophers have long theorized about what makes people's lives go well, and why, and the extent to which morality and self-interest can be reconciled. However, we have spent little time on meta-prudential questions, questions about prudential discourse--thought and talk about what is good and bad for us; what contributes to well-being; and what we have prudential reason, or prudentially ought, to do. This situation is surprising given that prudence is, *prima facie*, a normative form of discourse and cries out for further investigation of what it is like and whether it has problematic commitments. It also marks a stark contrast from moral discourse, about which there has been extensive theorizing, in meta-ethics.

Feeling Like It

A Theory of Inclination and Will

You may have an inclination to do it, but there is still a moment when you can decide to do it or not. This "moment of drama" is more puzzling than it first appears. When you are inclined to do something, are you related to your inclination as rider to horse? As ruler to subject? As thinker to thoughts? Schapiro shows that these familiar pictures fail to confront the central puzzle. Inclinations are motives with respect to which we are distinctively passive. But to be motivated is to be active—to be self-moved. How can you be passive in relation to your own activity?

Empirically Engaged Evolutionary Ethics

A growing body of evidence from the sciences suggests that our moral beliefs have an evolutionary basis. To explain how human morality evolved, some philosophers have called for the study of morality to be naturalized, i.e., to explain it in terms of natural causes by looking at its historical and biological origins. The present literature has focused on the link between evolution and moral realism: if our moral beliefs enhance fitness, does this mean they track moral truths? In spite of the growing empirical evidence, these discussions tend to remain high-level: the mere fact that morality has evolved is often deemed enough to decide questions in normative and meta-ethics.

Ethics and Insurrection

A Pragmatism for the Oppressed

Ethics and Insurrection articulates an ethical position that takes critical pragmatism and Harrisian insurrectionist philosophy seriously. It suggests that there are values and norms that create boundaries that confine, reduce and circumscribe the actions we allow ourselves to consider. McBride argues that an insurrectionist ethos is integral in the disavowing of norms and traditions that justify or perpetuate oppression and that we must throw our faith behind something, some set of values, if we want a chance at shaping a future.

Ethics and Engineering

An Introduction

The world population is growing, yet we continue to pursue higher levels of well-being, and as a result, increasing energy demands and the destructive effects of climate change are just two of many major threats that we face. Engineers play an indispensable role in addressing these challenges, and whether they recognize it or not, in doing so they will inevitably encounter a whole range of ethical choices and dilemmas. This book examines and explains the ethical issues in engineering, showing how they affect assessment, design, sustainability, and globalization, and explores many recent examples including the Fukushima Daiichi nuclear disaster, Dieselgate, 'naked scanners' at airports, and biofuel production.

Ethics and Christian Musicking

Editors: Nathan Myrick & ...

Hardcover: 296 Pages

Publisher: Routledge
March 2021

The relationship between musical activity and ethical significance occupies long traditions of thought and reflection both within Christianity and beyond. From concerns regarding music and the passions in early Christian writings through to moral panics regarding rock music in the 20th century, Christians have often gravitated to the view that music can become morally weighted, building a range of normative practices and prescriptions upon particular modes of ethical judgment. But how should we think about ethics and Christian musical activity in the contemporary world?

Forgiveness and Its Moral Dimensions

Philosophical interest in forgiveness has seen a resurgence. This interest reflects, at least in part, a large body of new work in psychology, several newsworthy cases of institutional apology and forgiveness, and intense and increased attention to the practices surrounding responsibility, blame, and praise. In this book, some of the world's leading philosophers present twelve entirely new essays on forgiveness. Some contributors have been writing about forgiveness for decades. Others have taken the opportunity here to develop their thinking about forgiveness they broached in other work. For some contributors, this is their first time writing on forgiveness.

Guided by Voices

Moral Testimony, Advice, and Forging a 'We'

Authors:
Eric Wiland

Hardcover:
208 Pages

Publisher:
Oxford University
Press; April 2021

We often rely on others for guidance about what to do. But wouldn't it be better to rely instead on only your own solo judgment? Deferring to others about moral matters, after all, can seem to conflict what Enlightenment demands. In *Guided by Voices*, however, Eric Wiland argues that there is nothing especially bad about relying on others in forming your moral views. You may rely on others for forming your moral views, just as you can your views about anything else. You can accept moral testimony without loss. Furthermore, there are several distinctive social goods attainable by being guided by what others say. Thus, it can be better to be guided by moral testimony than by your own moral lights.

Freedom of Speech and Expression

Its History, Its Value, Its Good Use, and Its Misuse

Sir Richard Sorabji here examines free speech through a historical lens from antiquity up to today. He first traces the concept's origins in ancient India, Rome, and Greece, and follows its evolution through early Christian, medieval, and Arabic philosophy. He then evaluates historical threats to free speech in literary, political, and religious contexts, and various legal constraints that have attempted to protect it. He discusses the tension between the benefits of free speech and its frustrations and abuses, and argues for the use of voluntary self-restraint on such speech that frustrates its benefits, citing for example the art identified by Gandhi as "opening ears." Finally, he closes with an analysis of free speech on social media and the abuse of personal data and voter manipulation.

Forgiveness and Moral Understanding

This book sets out to deepen our moral understanding by thinking about forgiveness: what does it mean for our understanding of morality that there is such a thing as forgiveness? Forgiveness is a challenge to moral philosophy, for forgiveness challenges us: it calls me to understand my relations to others, and thereby myself, in a new way. Without arguing for or against forgiveness, the present study tries to describe these challenges. These challenges concern both forgiving and asking for forgiveness. The latter is especially important in this context: what does the need to be forgiven mean?

How Do Humans Become Moral?

How Do Humans Become Moral? Social Domain Approach to Moral Development explores various themes regarding moral development, from human nature to civil disobedience. Because moral development is such a complex and multifaceted theme, no single psychologist has succeeded in explaining the whole truth of human morality. Thus, it is essential to review critically the implicit and explicit theories of diverse psychologists and, furthermore, to embrace different disciplines, from philosophy to neuroscience, in order to reach some insights about morals. In this book, the social domain theory of Turiel provides a theoretical frame and methodological standard for the review of empirical and analytical studies of morality.

Euthanasia and the Ethics of a Doctor's Decisions

An Argument Against Assisted Dying

Why do so many doctors have profound misgivings about the push to legalise euthanasia and assisted suicide? Ole Hartling uses his background as a physician, university professor and former chairman of the Danish Council of Ethics to introduce new elements into what can often be understood as an all too simple debate. Alive to the case that assisted dying can be driven by an unattainable yearning for control, Hartling concentrates on two fundamental questions: whether the answer to suffering is to remove the sufferer, and whether self-determination in dying and death is an illusion.

Intellectual Dependability

A Virtue Theory of the Epistemic and Educational Ideal

Intellectual Dependability is the first research monograph devoted to addressing the question of what it is to be an intellectually dependable person—the sort of person on whom one's fellow inquirers can depend in their pursuit of epistemic goods. While neglected in recent scholarship, this question is an important one for both epistemology—how we should conceptualize the ideal inquirer—and education—how we can enable developing learners to grow toward this ideal. The book defends a virtue theory according to which being an intellectually dependable person is distinctively a matter of possessing a suite of neglected virtues called "the virtues of intellectual dependability" that are themselves distinctively concerned with promoting epistemic goods in others' inquiries.

Inquiry, Knowledge, and Understanding

Author: Christoph Kelp
Hardcover: 224 Pages
Publisher: Oxford University Press; June 2021

Inquiry, Knowledge, and Understanding takes inquiry as the starting point for epistemological theorising. It uses this idea to develop new and systematic answers to some of the most fundamental questions in epistemology, including about the nature of core epistemic phenomena (most importantly: knowledge and understanding) as well as their value and the extent to which we possess them. Christoph Kelp argues that knowledge is the constitutive aim of inquiry into specific questions and that understanding is the constitutive aim of inquiry into general phenomena. He shows that these claims shed light on the nature of knowledge and understanding.

How to Enhance Morality

This book offers an innovative approach to moral enhancement. We, as humans, have a moral duty to be as good as we can be. Hence, moral bio-enhancement (MBE), if effective and safe, is our moral duty. However, it has to be voluntary because if it is made compulsory, human freedom (of the will) would be curtailed. As freedom (of the will) is an essential component of humanness, compulsory MBE would infringe upon our humanness.

Persecution and Morality

Intersections and Tensions between Freud and Lévinas

This book shows how persecution is a condition that binds each in an ethical obligation to the other. Persecution is functionally defined here as an impinging, affective relation that is not mediated by reason. It focuses on the works and personal lives of Emmanuel Lévinas—a phenomenological ethicist who understood persecution as an ontological condition for human existence—and Sigmund Freud, the inventor of psychoanalysis who proposed that a demanding superego is a persecuting psychological mechanism that enables one to sadistically enjoy moral injunctions.

Locke on Persons and Personal Identity

Ruth Boeker offers a new perspective on Locke's account of persons and personal identity by considering it within the context of his broader philosophical project and the philosophical debates of his day. Her interpretation emphasizes the importance of the moral and religious dimensions of his view. By taking seriously Locke's general approach to questions of identity, Boeker shows that we should consider his account of personhood separately from his account of personal identity over time. On this basis, she argues that Locke endorses a moral account of personhood, according to which persons are subjects of accountability, and that his particular thinking about moral accountability explains why he regards sameness of consciousness as necessary for personal identity over time.

Good Lives

Autobiography, Self-Knowledge,
Narrative, and Self-Realization

Samuel Clark provides an authoritative critique of narrative and a defence of a self-realization account of the self and its good. He investigates the wide range of extant accounts of the self and of the good life, and defends pluralist realism about self-knowledge by reading and reasoning with autobiographies of self-discovery, martial life, and solitude. The volume concludes by showing that autobiography can be reasoning in pursuit of self-knowledge; each of us is an unchosen, initially opaque, seedlike self; our good is the development and expression of our latent capacities, which is our individual self-realization; and self-narration plays much less role in our lives than some thinkers have supposed, and the development and expression of potential much more.

Practical Necessity, Freedom, and History

From Hobbes to Marx

By means of careful analysis of relevant writings by Hobbes, Rousseau, Kant, Hegel, and Marx, David James argues that the concept of practical necessity is key to understanding the nature and extent of human freedom. Practical necessity means being, or believing oneself to be, constrained to perform certain actions in the absence (whether real or imagined) of other, more attractive options, or by the high costs involved in pursuing other options. Agents become subject to practical necessity as a result of economic, social, and historical forces over which they have, or appear to have, no effective control, and the extent to which they are subject to it varies according to the amount of economic and social power that one agent possesses relative to other agents.

Media Corruption in the Age of Information

This book provides an applied model of corruption to identify, analyse, and assess the ethics of major types of corruption in the media involving practices such as cash-for-comment, media release journalism, including video news releases (VNRs), fake news, deep fakes, and staged news. The book starts with a conceptual philosophical analysis of corruption in general, followed by an in-depth analysis of media corruption, across its various transformations, from the legacy media of the 4th Estate (e.g. The UK Guardian) to the digital media of the 5th Estate (e.g. Social Media and Wikileaks) to the Network Media of the 6th Estate (e.g. Facebook and Google), and provides key case studies as practical illustrations and contextualisation of those major types of media corruption.

Justice and Egalitarian Relations

Why does equality matter, as a social and political value, and what does it require? Relational egalitarians argue that it does not require that people receive equal distributive shares of some good, but that they relate as equals. Christian Schemmel here provides the first comprehensive development of a liberal conception of relational equality, one which understands relations of non-domination and egalitarian norms of social status as stringent demands of social justice.

Author: Christian Schemmel

The Human Embryo In Vitro

Breaking the Legal Stalemate

The Human Embryo in vitro explores the ways in which UK law engages with embryonic processes under the Human Fertilisation and Embryology Act 1990 (as amended), the intellectual basis of which has not been reconsidered for almost thirty years. McMillan argues that in regulating 'the embryo' – that is, a processual liminal entity in itself - the law is regulating for uncertainty. This book offers a fuller understanding of how complex biological processes of development and growth can be better aligned with a legal framework that purports to pay respect to the embryo while also allowing its destruction. To do so it employs an anthropological concept, liminality, which is itself concerned with revealing the dynamics of process.

Harmonious Technology

A Confucian Ethics of Technology

Technology has become a major subject of philosophical ethical reflection in recent years, as the novelty and disruptiveness of technology confront us with *new* possibilities and *unprecedented* outcomes as well as *fundamental* changes to our "normal" ways of living that demand deep reflection of technology. However, philosophical and ethical analysis of technology has until recently drawn primarily from the Western philosophical and ethical traditions, and philosophers and scholars of technology discuss the potential contribution of non-Western approaches only sparingly. Given the global nature of technology, however, there is an urgent need for multiculturalism in philosophy and ethics of technology that include non-Western perspectives in our thinking about technology.

Kant's Justification of Ethics

Kant's arguments for the reality of human freedom and the normativity of the moral law continue to inspire work in contemporary moral philosophy. Many prominent ethicists invoke Kant, directly or indirectly, in their efforts to derive the authority of moral requirements from a more basic conception of action, agency, or rationality. But many commentators have detected a deep rift between the *Groundwork for the Metaphysics of Morals* and the *Critique of Practical Reason*, leaving Kant's project of justification exposed to conflicting assessments and interpretations. In this ground-breaking study of Kant, Owen Ware defends the controversial view that Kant's mature writings on ethics share a unified commitment to the moral law's primacy.

Morals and Emotions

Author: Shane Johnson
Hardcover: 454 Pages
Publisher: Independently published; May 2021

Relationships between morals and emotions are first derived theoretically against the background of the developmental psychological theories of Lawrence Kohlberg and Manfred Holodynskis and the respective discourses. On this basis, a hypothetical working model of Kohlberg's theory on moral judgment competence and Holodynski's theory of emotion will be created, and the measurement of both abilities will be discussed. Following the generation of a suitable measuring instrument, children and adolescents between the ages of ten and 17 in regular school types are examined with regard to the connection between these competencies. The influencing factors of age, educational level.

Moral Injury and Soldiers in Conflict

Political Practices and Public Perceptions

In the past decade, the concept of moral injury has emerged to address the potential moral impact of deployment. This book contributes to an interdisciplinary conceptualization of moral injury while, at the same time, critically evaluating the concept's premises and implications. It paints an urgent and compassionate picture of the moral impact of soldiers' deployment experience and the role of political practices and public perceptions in moral injury. It does so by drawing on the experiences of close to a hundred Dutch veterans deployed to Bosnia (Srebrenica) and Afghanistan, and analyzing their stories from the perspectives of psychology, philosophy, theology and social sciences. Ultimately, this book advances the understanding of moral, political and societal dimensions of moral injury and contributes to practical efforts aimed at its prevention.

Property and Justice

A Liberal Theory of Natural Rights

This book gives an account of a full spectrum of property rights and their relationship to individual liberty. It shows that a purely deontological approach to justice can deal with the most complex questions regarding the property system. Moreover, the author considers the economic, ecological, and technological complexities of our real-world property systems. The result is a more conceptually sound account of natural rights and the property system they demand.

Naturally Free Action

In *Naturally Free Action*, Oisín Deery argues that free will exists, where free will is understood as the ability to act freely, and free actions as exercises of that ability. Deery reaches his conclusion by showing how the concept of free will plausibly refers to many actual human behaviors, and how these behaviors count as a natural category or kind. Deery also addresses the role of phenomenology in fixing the reference of the concept, arguing that our phenomenology as of deciding or acting freely is typically accurate, even if determinism is true. The result is a realist, naturalistic framework for theorizing about free will, according to which free will almost certainly exists and we act freely. Deery's position mostly sidesteps the question of whether free will is compatible with determinism.

Kant's Doctrine of Virtue

Immanuel Kant's final publication in ethics was *The Doctrine of Virtue*, Part II of the 1797 *The Metaphysics of Morals*. This text presents Kant's normative ethical theory. This guide is meant to be read alongside Kant's text, combining accessible explanations and novel interpretations of this difficult text. It is the first book in English devoted to *The Doctrine of Virtue*, one of Kant's most significant works.

Public Reason and Bioethics

Three Perspectives

This book explores and elaborates three theories of public reason, drawn from Rawlsian political liberalism, natural law theory, and Confucianism. Drawing together academics from these separate approaches, the volume explores how the three theories critique each other, as well as how each one brings its theoretical arsenal to bear on the urgent contemporary debate of medical assistance in dying.

On Moral Psychology and Moral Philosophy

Towards a New Theory of Emotions, Motivations, and Ethics, Using the Insight that Emotions Pay Moral Debts and Moral Credits Owed to Self and Loved Ones

Previously published as *On Forgiveness* by Russell Hasan.

In *The Genealogy of Morals*, Friedrich Nietzsche put forward a theory of emotions which I refer to as emotional capitalism. If one of your friends or loved ones owes you a debt, and does not repay in kind, you may exact payment by being mean and nasty to them. If you owe them a debt, you can repay by being nice to them, or by letting them be mean to you. If someone owes you, you may seek their feelings and expressions of gratitude to pay the debt, or inflict emotional pain to recover your debt. Emotional capital is the debts and credits you owe, or are perceived to owe, to the people in your life.

Moral Progress

This inaugural volume in the Munich Lectures in Ethics series presents lectures by noted philosopher Philip Kitcher. In these lectures, Kitcher develops further the pragmatist approach to moral philosophy, begun in his book *The Ethical Project*. He uses three historical examples of moral progress--the abolition of chattel slavery, the expansion of opportunities for women, and the increasing acceptance of same-sex love--to propose methods for moral inquiry. In his recommended methodology, Kitcher sees moral progress, for individuals and for societies, through collective discussions that become more inclusive, better informed, and involve participants more inclined to engage with the perspectives of others and aim at actions tolerable by all.

On Memory, Marriage, Tears, and Meditation

Augustine understood that feeling, not rationality, gathers and reveals the deep longing of the whole person. Throughout his ecclesiastical career, he discussed marriage in sermons, letters, and treatises from the perspective of his own experience. Miles examines Augustine's prototypes for conversion – reading and conversion; sacrifice and conversion; and the importance of friends in what might be considered a subjective and private process. Meditation was central to Augustine's Christian life and Miles argues that his practice of meditation suggests that penitence included a rich range of feeling leading to gratitude, peace, wonder, and love.

Phenomenology of Bioethics

Technoethics and Lived-Experience

This book offers a unique description of how phenomenology can help professionals from medical, environmental and social fields to explore notions such as interaffectivity, empathy, epoche, reduction, and intersubjective encounter. Written by a group of top scholars, it uniquely covers the relationship between phenomenology and bioethics, and focuses not only on medical cases, but also on the environment and emerging technologies. This variety of themes, whilst including techno-ethics, environmental ethics, animal ethics, and medical ethics, is conducive to appreciating broadly how phenomenology can improve our quality of our life.

Queer Soul and Queer Theology

Ethics and Redemption in Real Life

Authors:

Laurel C. Schneider & ...

Hardcover:

142 Pages

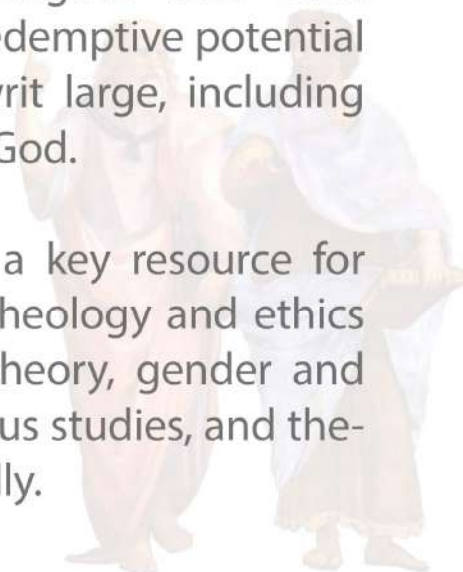

Publisher:

Routledge;

April 2021

In this book, queer "virtues" not only reveal and re-value queer soul but expose covert viciousness in the traditional (i.e., inherently colonial and racist, and thus ungodly) "family values" of dominant Christian ethics and theology. It argues that such re-imagining has redemptive potential for Christian life writ large, including the redemption of God.

This book will be a key resource for scholars of queer theology and ethics as well as queer theory, gender and race studies, religious studies, and theology more generally.

Practical Expressivism

What is morality? In *Practical Expressivism*, Neil Sinclair argues that morality is a purely natural interpersonal co-ordination device, whereby human beings express their attitudes in order to influence the attitudes and actions of others.

The ultimate goal of these expressions is to find acceptable ways of living together. This 'expressivist' model for understanding morality faces well-known challenges concerning 'saving the appearances' of morality, because morality presents itself to us as a practice of objective discovery, not pure expression.

Moral Psychology

This Element provides an overview of some of the central issues in contemporary moral psychology. It explores what moral psychology is, whether we are always motivated by self-interest, what good character looks like and whether anyone has it, whether moral judgments always motivate us to act, whether what motivates action is always a desire of some kind, and what the role is of reasoning and deliberation in moral judgment and action. This Element is aimed at a general audience including undergraduate students without an extensive background in philosophy.

Sexual Ethics in a Secular Age

Is There Still a Virtue of Chastity?

The virtue of chastity has traditionally been portrayed as an excellent personal disposition concerning the ideal ordering of sexual desire such that the person desires that which is actually good for both the self and others affected by his or her sexual desires and actions. Yet, for roughly the past half century chastity has been increasingly portrayed as an unnecessary ideal with few secular benefits that could not be otherwise obtained. Instead, chastity is sometimes portrayed as an odd kind of religious asceticism with few secular benefits. The essays in this volume ask whether there may be advantages to reconsidering a contemporary virtue of chastity. A recovered and reconceptualized concept of chastity can offer partial solutions to problems associated with externalized sexual desire, including sweeping patterns of sexual harassment, the high divorce/relationship-failure rate, and widespread pornography use.

Practical and Professional Ethics

Key Concepts

Before we can resolve or avoid an ethical problem, we need to understand what makes something ethical. *Practical and Professional Ethics: Key Concepts* introduces us to a series of real cases where the stakes can be high, the situations complex, and the ethical issues often difficult to see.

By guiding us through the concepts, issues and skills at play when we face an ethical problem, we learn how to find a solution. Ideal for students or professionals, this book provides the grounding required to become a more complex moral thinker, a quality that can be applied in a number of fields and jobs.

Morality and Practical Reasons

As Socrates famously noted, there is no more important question than how we ought to live. The answer to this question depends on how the reasons that we have for living in various different ways combine and compete. To illustrate, suppose that I've just received a substantial raise. What should I do with the extra money? I have most moral reason to donate it to effective charities but most self-interested reason to spend it on luxuries for myself. So, whether I should live my life as I have most moral reason to live it or as I have most self-interested reason to live it depends on how these and other sorts of reasons combine and compete to determine what I have most reason to do, all things considered. This Element seeks to figure out how different sorts of reasons combine and compete to determine how we ought to live.

Philosophy and Climate Change

Editors: Mark Budolfson & ...

Hardcover: 432 Pages

Publisher: Oxford University Press; June 2021

Climate change is poised to threaten, disrupt, and transform human life, and the social, economic, and political institutions that structure it. *Philosophy and Climate Change* argues that understanding climate change, and discussing how to address it, should be at the very center of our public conversation. It shows that philosophy can make an enormous contribution to that conversation, but only if both philosophers and non-philosophers understand what it can contribute. The sixteen original articles collected in this volume both illustrate the diverse ways that philosophy can contribute to this conversation, and ways in which thinking about climate change can help to illuminate a range of topics of independent interest to philosophers.

Precautionary Reasoning in Environmental and Public Health Policy

This book fills a gap in the literature on the Precautionary Principle by placing the principle within the wider context of precautionary reasoning and uses philosophical arguments and case studies to demonstrate when it does—and does not—apply. The book invites the reader to take a step back from the controversy surrounding the Precautionary Principle and consider the overarching rationales for responding to threats to the environment or public health. It provides practical guidance and probing insight for the intended audience, including scholars, students, journalists, and policymakers.

Reasons, Justification, and Defeat

Editors: Jessica Brown & ...

Hardcover: 304 Pages

Publisher: Oxford University Press; June 2021

Traditionally, the notion of defeat has been central to epistemology, practical reasoning, and ethics. Within epistemology, it is standardly assumed that a subject who knows that *p*, or justifiably believes that *p*, can lose this knowledge or justified belief by acquiring a so-called 'defeater', whether that is evidence that not-*p*, evidence that the process that produced her belief is unreliable, or evidence that she has likely misevaluated her own evidence. Within ethics and practical reasoning, it is widely accepted that a subject may initially have a reason to do something although this reason is later defeated by her acquisition of further information.

Morality and Metaphysics

In this book, Charles Larmore develops an account of morality, freedom, and reason that rejects the naturalistic metaphysics shaping much of modern thought. Reason, Larmore argues, is responsiveness to reasons, and reasons themselves are essentially normative in character, consisting in the way that physical and psychological facts - facts about the world of nature - count in favor of possibilities of thought and action that we can take up. Moral judgments are true or false in virtue of the moral reasons there are. We need therefore a more comprehensive metaphysics that recognizes a normative dimension to reality as well.

Sustaining Surveillance

The Importance of Information for Public Health

This book presents a comprehensive theory of the ethics and political philosophy of public health surveillance based on reciprocal obligations among surveillers, those under surveillance, and others potentially affected by surveillance practices. Public health surveillance aims to identify emerging health trends, population health trends, treatment efficacy, and methods of health promotion—all apparently laudatory goals. Nonetheless, as with anti-terrorism surveillance, public health surveillance raises complex questions about privacy, political liberty, and justice both of and in data use. Individuals and groups can be chilled in their personal lives, stigmatized or threatened, and used for the benefit of others when health information is wrongfully collected or used.

Prejudice

A Study in Non-Ideal Epistemology

Prejudiced beliefs may certainly seem like defective beliefs. But in what sense are they defective? Many will be false and harmful, but philosophers have further argued that prejudiced belief is defective also in the sense that it could only arise from distinctive kinds of epistemic irrationality: we could acquire or retain our prejudiced beliefs only by violating our epistemic responsibilities. It is also assumed that we are only morally responsible for the harms that prejudiced beliefs cause because, in forming these beliefs in the first place, we are violating our epistemic responsibilities. In *Prejudice*, Endre Begby argues that these common convictions are misguided. His discussion shows in detail that there are many epistemically justified pathways to prejudiced belief, and that it is a mistake to lean on the concept of epistemic responsibility to articulate our ethical responsibilities.

Redesigning AI

Artificial Intelligence (AI) is not likely to make humans redundant. Nor will it create superintelligence anytime soon. But it will make huge advances in the next two decades, revolutionize medicine, entertainment, and transport, transform jobs and markets, and vastly increase the amount of information that governments and companies have about individuals.

The Great Guide

What David Hume Can Teach Us about Being Human and Living Well

David Hume (1711–1776) is perhaps best known for his ideas about cause and effect and his criticisms of religion, but he is rarely thought of as a philosopher with practical wisdom to offer. Yet Hume's philosophy is grounded in an honest assessment of nature—human nature in particular. The Great Guide is an engaging and eye-opening account of how Hume's thought should serve as the basis for a complete approach to life. In this enthralling book, Julian Baggini masterfully interweaves biography with intellectual history and philosophy to give us a complete vision of Hume's guide to life.

The Impact of Corporate Culture and CMS

A Cross-Cultural Analysis on Internal and External Preventive Effects on Corruption

Author:
Kai-D Bussmann

Hardcover:
124 Pages

Publisher:
Springer
April 2021

Entering developing markets, companies are challenged by various cultures and widespread corruption. This book is a cross-cultural survey that explores the crime preventive effects of corporate cultures and compliance management systems (CMS) in China, India, Russia and Germany. Almost 2,000 managers anonymously reported about the compliance programs in place and cultures in their companies as well as on their experience with corruption at work and in everyday life. Despite differences across countries, results suggest that the elements of an integrity-promoting corporate culture are similarly important in their corruption preventive effects.

Respect

Philosophical Essays

Respect plays a prominent role in contemporary moral philosophy, as well as our every-day moral thought. Ordinary discussion about morality is often framed in terms of demands for respect or complaints about being disrespected, yet basic questions about the concept and role of respect are frequently overlooked. Here, leading philosophers present their latest ideas and fresh perspectives to point research on the topic in new directions.

Parfit's Ethics

Derek Parfit (1942–2017) was one of the most important and influential moral philosophers of the late 20th and early 21st centuries. This Element offers a critical introduction to his wide-ranging ethical thought, focusing especially on his two most significant works, *Reasons and Persons* (1984) and *On What Matters* (2011), and their contribution to the consequentialist moral tradition. Topics covered include: rationality and objectivity, distributive justice, self-defeating moral theories, Parfit's Triple Theory (according to which consequentialism, contractualism, and Kantian ethics ultimately converge), personal identity, and population ethics.

The Law as a Moral Agent

Making People Good

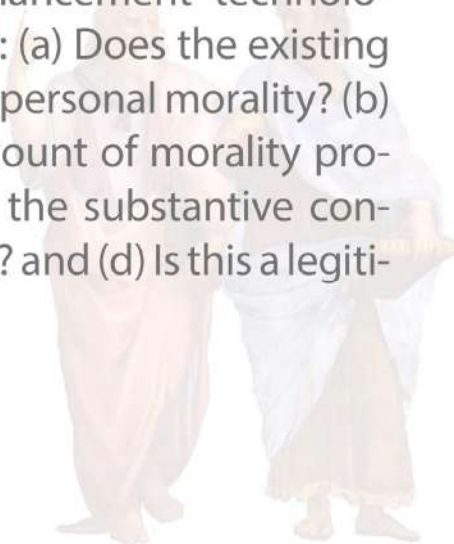

Authors:
Charles Foster & ...

Hardcover:
100 Pages

Publisher:
Palgrave Macmillan
March 2021

This book examines the controversial and repercussive contention that an objective of the law should be to promote personal morality - to make people ethically better. It surveys a number of domains, including criminal law, tort law, contract law, family law, and medical law (particularly the realm of moral enhancement technologies) asking for each: (a) Does the existing law seek to promote personal morality? (b) If so, what is the account of morality promoted, and what is the substantive content? (c) Does it work? and (d) Is this a legitimate objective?

The Fact of the Cage

Reading and Redemption In David Foster Wallace's "Infinite Jest"

David Foster Wallace's *Infinite Jest* raised expectations of what a novel might do. As he understood fiction to aim at what it means to be human, so he hoped his work might relieve the loneliness of human suffering. In that light, *The Fact of the Cage* shows how Wallace's masterpiece dramatizes the condition of encagement and how it comes to be met by "Abiding" and through inter-relational acts of speaking and hearing, touching, and facing. Revealing Wallace's theology of a "boneless Christ," *The Fact of the Cage* wagers that reading such a novel as *Infinite Jest* makes available to readers the redemption glimpsed in its pages, that reading fiction has ethical and religious significance—in short, that reading *Infinite Jest* makes one better. As such, Plank's work takes steps to defend the ethics of fiction, the vital relation between religion and literature, and why one just might read at all.

Philippa Foot's Metaethics

This Element presents an interpretation and defence of Philippa Foot's ethical naturalism. It begins with the often neglected grammatical method that Foot derives from an interpretation of Ludwig Wittgenstein's later philosophy. This method shapes her approach to understanding goodness as well as the role that she attributes to human nature in ethical judgment. Moral virtues understood as perfections of human powers are central to Foot's account of ethical judgment. The thrust of the interpretation offered here is that Foot's metaethics takes ethical judgment to be tied to our self-understanding as a sort of rational animal. Foot's metaethics thereby offers a compelling contemporary approach that preserves some of the best insights of the Aristotelian tradition in practical philosophy.

The Nature of Desert Claims

Rethinking What it Means to Get One's Due

Our everyday conversations reveal the widespread assumption that positive and negative treatment of others can be justified on the grounds that 'they deserve it'. But what is it exactly to deserve something? In this book, Kevin Kinghorn explores how we came to have this concept and offers an explanation of why people feel so strongly that redress is needed when outcomes are undeserved. Kinghorn probes for that core concern which is common to the range of everyday desert claims people make, ultimately proposing an alternative model of desert which represents a fundamental challenge to the received wisdom on the structure of desert claims.

The Logical Fallacy of Altruism

A logical fallacy is a thought process that violates a rule of proper thinking. A rule of proper thinking is a rule defined by logicians through discovery of logical truths and how to frame good arguments. Correct arguments are defined as proper generalized expressions that define logical truths or knowledge. With a logical fallacy, either the contrary or the contradictory of the logical argument is said to be true. In effect, a rule of logical reasoning addresses all of the common modes of valid argument while the faulty argument contradicts them. This book examines altruism as a logical fallacy.

The Moral Powers

A Study of Human Nature

The Moral Powers: A Study of Human Nature is a philosophical investigation of the moral potentialities and sensibilities of human beings, of the meaning of human life, and of the place of death in life. It is an essay in philosophical anthropology: the study of the conceptual framework in terms of which we think about, speak about, and investigate homo sapiens as a social and cultural animal. This volume examines the diversity of values in human life and the place of moral value within the varieties of values. Its subject is the nature of good and evil and our propensity to virtue and vice.

The Police Identity Crisis

Hero, Warrior, Guardian, Algorithm

This book provides a comprehensive examination of the police role from within a broader philosophical context. Contending that the police are in the midst of an identity crisis that exacerbates unjustified law enforcement tactics, Luke William Hunt examines various major conceptions of the police—those seeing them as heroes, warriors, and guardians. The book looks at the police role considering the overarching societal goal of justice and seeks to present a synthetic theory that draws upon history, law, society, psychology, and philosophy. Each major conception of the police role is examined in light of how it affects the pursuit of justice, and how it may be contrary to seeking justice holistically and collectively.

Principles and Persons

The Legacy of Derek Parfit

Derek Parfit, who died in 2017, is widely believed to have been the most significant moral philosopher in well over a century. The twenty-one new essays in this book have all been inspired by his work. They address issues with which he was concerned in his writing, particularly in his seminal contribution to moral philosophy, *Reasons and Persons* (OUP, 1984). Rather than simply commenting on his work, these essays attempt to make further progress with issues, both moral and prudential, that Parfit believed matter to our lives: issues concerned with how we ought to live, and what we have most reason to do.

Rational Rules

Towards a Theory of Moral Learning

Moral systems, like normative systems more broadly, involve complex mental representations. *Rational Rules* proposes that moral learning can be understood in terms of general-purpose rational learning procedures. Nichols argues that statistical learning can help answer a wide range of questions about moral thought: Why do people think that rules apply to actions rather than consequences? Why do people expect new rules to be focused on actions rather than consequences? How do people come to believe a principle of liberty, according to which whatever is not expressly prohibited is permitted?

The Pleasure of Punishment

Based on a reading of contemporary philosophical arguments, this book accounts for how punishment has provided audiences with pleasure in different historical contexts. Watching tragedies, contemplating hell, attending executions, or imagining prisons have generated pleasure, according to contemporary observers, in ancient Greece, in medieval Catholic Europe, in the early-modern absolutist states, and in the post-1968 Western world. The pleasure was often judged morally problematic, and raised questions about which desires were satisfied, and what the enjoyment was like. This book offers a research synthesis that ties together existing work on the pleasure of punishment.

Religion and the Technological Future

An Introduction to Biohacking, Artificial Intelligence, and Transhumanism

We live in an age of rapid technological advancement. Never before has humankind wielded so much power over our own biology. Biohacking, the attempt at human enhancement of physical, cognitive, affective, moral, and spiritual traits, has become a global phenomenon. This textbook introduces religious and ethical implications of biohacking, artificial intelligence, and other technological changes, offering perspectives from monotheistic and karmic religions and applied ethics. These technological breakthroughs are transforming our societies and ourselves fundamentally via genetic modification, tissue engineering, artificial intelligence, robotics, the merging of computer technology with human biology, extended reality, brain stimulation, and nanotechnology.

The Routledge Handbook of Vegan Studies

Emerging in the early 21st century, vegan studies is distinct from more familiar conceptions of "animal studies," an umbrella term for a three-pronged field that gained prominence in the late 1990s and early 2000s, consisting of critical animal studies, human animal studies, and posthumanism. While veganism is a consideration of these modes of inquiry, it is a decidedly different entity, an ethical delineator that for many scholars marks a complicated boundary between theoretical pursuit and lived experience. The Routledge Handbook of Vegan Studies is the must-have reference for the important topics, problems, and key debates in the subject area and is the first of its kind.

Subjective versus Objective Moral Wrongness

There is presently a debate between Subjectivists and Objectivists about moral wrongness. Subjectivism is the view that the moral status of our actions, whether they are morally wrong or not, is grounded in our subjective circumstances – either our beliefs about, or our evidence concerning, the world around us. Objectivism, on the other hand, is the view that the moral status of our actions is grounded in our objective circumstances – all those facts other than those which comprise our subjective circumstances. A third view, Ecumenism, has it that the moral status of our actions is grounded both in our subjective and our objective circumstances. After outlining and evaluating the various arguments both against Subjectivism and against Objectivism, this Element offers a tentative defense of Objectivism about moral wrongness.

Theology and Climate Change

Theology and Climate Change examines Progressive Dominion Theology (PDT) as a primary cultural driver of anthropogenic climate change. PDT is a distinctive and Western form of Christian theology out of which the modern scientific revolution and technological modernity arises. Basic attitudes to nature, to instrumental power over nature, and to an understanding of humanity's relationship with nature are a function of the deep theological preconditions of Western modernity. Much of what we like about Western modernity is indebted to PDT at the same time that this tacit cultural theology is propelling us towards climate disaster.

The Ultimate Enhancement of Morality

This book deals with good, evil, happiness and morally enhanced post-humans. It offers a succinct historical elaboration of philosophical stances towards morality and happiness, focusing on Kant's ideas in particular. Human augmented ethical maturity in a futuristic version of Kant's Ethical Commonwealth implies, among else, voluntary moral bio-enhancement (VMBE); consequently, more happiness – as morality and happiness are in a circularly supportive relationship; ultimate morality (UM).

University Responsibility for the Adjudication of Research Misconduct

The Science Bubble

This book offers a scientific whistleblower's perspective on current implementation of federal research misconduct regulations. It provides a narrative of general interest that relates current cases of research ethics to philosophical, historical and sociological accounts of fraud in scientific research. The evidence presented suggests that the problems of falsification and fabrication remain as great as ever, but hidden because the current system puts universities in charge of investigations and permits them to use confidentiality regulations to hide the outcomes of investigations. The book documents the significant conflict of interest that arises because federal regulation gives universities the responsibility to conduct investigations of their own faculty with severely limited oversight.

World on Fire

Humans, Animals, and the Future of the Planet

Mark Rowlands presents a novel analysis of three epoch-defining environmental problems: *climate*, *extinction*, and *pestilence*. Our climate is changing at a rate that is unprecedented and, if unchecked, disastrous. Species are disappearing hundreds or thousands of times faster than normal. COVID-19 has wreaked social and economic havoc but is merely the latest off a blossoming production line of emerging infectious diseases, many of which have the potential to be far worse. Rowlands establishes that all three problems are consequences of choices we have made about energy, which can be divided into two major forms: fuel and food. Focusing on food choices as far more central to the issue than commonly recognized, he argues that the solution is breaking our collective habit of eating animals.

We the Gamers

How Games Teach Ethics and Civics

Ethics and civics have always mattered, but perhaps they matter now more than ever before. Recently, with the rise of online teaching and movements like #PlayApartTogether, games have become increasingly acknowledged as platforms for civic deliberation and value sharing. *We the Gamers* explores these possibilities by examining how we connect, communicate, analyze, and discover when we play games. Combining research-based perspectives and current examples, this volume shows how games can be used in ethics, civics, and social studies education to inspire learning, critical thinking, and civic change.

Why It's OK to Enjoy the Work of Immoral Artists

The #metoo movement has forced many fans to consider what they should do when they learn that a beloved artist has acted immorally. One natural thought is that fans ought to give up the artworks of immoral artists. In *Why It's OK to Enjoy the Work of Immoral Artists*, Mary Beth Willard argues for a more nuanced view. Enjoying art is part of a well-lived life, so we need good reasons to give it up. And it turns out good reasons are hard to find. Willard shows that it's reasonable to believe that most boycotts of artists won't succeed, so most of the time there's no ethical reason to join in. Someone who manages to separate the art from the artist isn't making an ethical mistake by buying and enjoying their art.
